WORK EXPERIENCE

Developer

Final Year Project

- **EduTech:** Currently working on product ideas of EduTech **Educist** and gain a lot of experience and skills also gaining valuable experience working with resilience Advisory services. Working as a Backend developer in this project.
- **Auditaxis:** Currently contributing to the development of Auditaxis, a **SaaS platform** for efficient client and team management, troubleshooting, and role-based authentication. Serving as a Backend Developer, focusing on scalable, clean, and reusable code to deliver robust solutions.
- **Shopify and Wordpress:** I have developed Multiple Ecommerce store on wordpress and shopify both and have experienced a good understanding of all the major functionalities that exist in Ecommerce store and also using wooCommerce built an fully functional Ecommerce store named Decorbuddies.
- **Point-of-Sales-Terminal:** I created a POS application using java. This project helped me to understand complex flows of a project and how different modules work together to build a scalable and maintainable project.
- **Address Book (Desktop App):** This project helped me to understand how to build GUIs using java and how inner classes help us to handle different events with less code, improving the developers experience and making the code more maintainable in long run.
